### Summer Food Drinks

Do not consider "400" Carbonated Beverages entirely as luxuries. They contain food value of equal amount as buttermilk. In the summer time you naturally want to eat food which is quickly digested and does not over heat your system.

Of course, food can be in liquid form and that is what "400" beverages are—"Summer Food Drinks". Being harmless you can drink these popular beverages as often as you are thirsty. All ingredients are pure and the fact that they are carbonated and bottled insures you against having disease germs. Carbonation eliminates contamination.
